

Advanced AI Masterclass: AntiGravity, Stitch & Premium Suite (Deep Dive)

Adarsh, ye aapke liye sabse detailed aur humanized guide hai jo 2026 ke latest tools ko zero se advance tak sikhayegi.

1. Google AntiGravity: The "Agent-First" IDE

Deep Explanation (Key Points):

- **Duniya ka pehla Agent-First AI:** Ye sirf ek editor nahi hai, balki ek agent-driven platform hai jahan 5-10 AI agents ek saath kaam kar sakte hain.
- **Three Surface Control:** Agent ke paas Editor (code likhna), Terminal (command run karna), aur Browser (live test karna) ka poora access hota hai.
- **Self-Improving Knowledge Base:** Aapka agent har task se seekhta hai aur use memory me save kar leta hai, jisse wo har naye din pehle se better kaam karta hai.
- **Browser Sub-Agent:** Ye sabse unique hai. Agent khud Chrome open karta hai, aapki app ke elements click karta hai, forms fill karta hai aur recordings deta hai.
- **Zero Code Required:** Aapko sirf English/Hindi me task bolna hai, agent autonomous tareeqe se poori full-stack app khadi kar dega.
- **Multi-Model Integration:** Ek hi app me aap Gemini 3.1 Pro, Claude 3.5 Sonnet, aur GPT-4o models ko switch kar sakte hain.

Installation Process (Step-by-Step):

1. **Download:** AntiGravity ki official website par jayein aur apne OS (Windows/Mac/Linux) ke liye installer download karein.
2. **Initial Setup:** Mac users DMG file ko 'Applications' me drag karein. Windows users EXE file run karein.
3. **Mode Selection:** App open karte hi 'Review Driven Development' select karein (isne agent kaam ke baad aapse permission mangega, jo sabse best hai).
4. **Sign-In:** Apne Google account se login karein. Aapko free daily quota milega.
5. **Workspace Creation:** Desktop par ek naya folder banayein (e.g., 'My_AI_Projects') aur AntiGravity me 'Open Folder' karke ise select karein.

Example Usage & Prompt:

Example: Ek complete responsive Wallpaper website banana jo mobile aur desktop dono par chale.

Prompt: "Adarsh here. Build a complete Wallpaper Web App using Pexels API.

Use a dark theme by default but give a toggle button for light mode. Make sure it follows a clean folder architecture. After building, open the browser, search for 'Nature' wallpapers, and show me that it's working."

2. Google Stitch: The AI UI/UX Designer

Deep Explanation (Key Points):

- **Figma ka AI Alternative:** Ye design tool specifically premium websites aur mobile apps ke high-fidelity designs banane ke liye hai.
- **10-Design Generation:** Aap ek hi prompt se website ke 10 alag-alag design styles mang sakte hain (Modern, 3D, Minimalist, etc.).
- **Interactive Prototypes:** Ye sirf static images nahi, balki clickable prototypes aur animation frames bhi generate karta hai.
- **Voice Command Support:** Aap bol kar design me changes karwa sakte hain (jaise "Make the button red and rounded").
- **Direct Code Export:** Design pasand aane par aap iska code ya assets directly AntiGravity me import kar sakte hain.
- **Skill Integration:** AntiGravity me 'Stitch Skills' install karne par agent khud Stitch ke designs use karke code likh deta hai.

Installation & Connection (Step-by-Step):

1. **Account:** Google Stitch ki website par jayein aur sign up karein.
2. **API Key:** Settings me ja kar 'Generate API Key' par click karein aur use copy karein.
3. **AntiGravity Connection:** AntiGravity open karein > Three dots (top right) > MCP Servers > Search 'Stitch' > Paste API Key > Save.
4. **Install Skills:** AntiGravity agent ko command dein: "Install Stitch Skills."

Example Usage & Prompt:

Example: Ek Fintech app ke liye 5 unique dark-themed landing page designs banana.

Prompt: "Use Google Stitch to create 5 different design variations for a Personal Finance Dashboard.

Focus on 3D elements for the hero section and a clean transaction list.

Make sure it follows 2026 UI trends."

3. Pomelli AI: The AI Marketer (Ad Generator)

Deep Explanation (Key Points):

- **Instant Branding Extraction:** Aap sirf kisi website ka link daalte hain, aur ye uske colors, logo, aur products ko samajh leta hai.
- **AI Influencer Ads:** Ye static images ki jagah aise video ads banata hai jisme AI-generated influencers aapke product ko use kar rahe hote hain.
- **Free for Use:** Ye Google ka tool hai jo filhal users ke liye free me available hai.
- **End-to-End Ad Suite:** Ye copywriting, design, aur video editing teeno kaam akele karta hai.
- **Platform Optimization:** Ye ads ko Facebook, Instagram aur TikTok ke format me optimize karke deta hai.

How to Use (Steps):

1. Pomelli AI portal par jayein.
2. Apne business ya product ka URL paste karein.
3. AI ko apna target audience batayein (e.g., 'Students in India').
4. 'Generate Ads' par click karein aur output download karein.

Example Usage & Prompt:

Example: Ek naye Smart Watch brand ke liye Instagram video ad banana.

Prompt: "Scan this website [link]. Create a 15-second high-energy

video ad for Instagram.

Show an AI influencer using the watch during a morning run. Include a CTA button: 'Buy Now'."

4. Claude Co-Work: The Desktop Automation Agent

Deep Explanation (Key Points):

- **Operating System Access:** Ye aapke laptop ke files, folders, aur apps ko directly control kar sakta hai.
- **Scheduled Tasks:** Aap isme routine set kar sakte hain (jaise "Every Monday morning, summarize my emails").
- **File Manipulation:** Ye PDFs read karke PPT bana sakta hai, images resize kar sakta hai, aur docs me sign kar sakta hai.
- **Research Specialist:** Ye internet browse karke latest viral news nikalta hai aur us par scripts likh deta hai.
- **Cross-Platform:** Ye MacBook aur Windows dono par background me chalta rehta hai.

Setup Steps:

1. Claude AI ki desktop app download karein.
2. 'Claude Pro' subscription (approx 1500-2000 INR) activate karein (co-work feature ke liye zaroori hai).
3. Settings me ja kar 'Allow Desktop Control' ko enable karein.

Example Usage & Prompt:

Example: Har roz subah Twitter se top 5 AI news nikal kar unka real script likhna.

Prompt: "Schedule a task: Every day at 9 AM, browse Twitter for viral AI tools."

Write a 60-second YouTube Short script for the best one and save it as a .txt file on my Desktop."

5. Granola AI: The Invisible Meeting Assistant

Deep Explanation (Key Points):

- **No Bot Required:** Ye dusre AI tools ki tarah meeting me bot nahi bhejta, balki aapke laptop ka system audio sunta hai.
- **Automatic Summary:** Meeting khatam hote hi ye poora "Actionable Items" aur "Summary" doc ready kar deta hai.
- **Context Awareness:** Ye sirf audio sunta hi nahi, balki meeting ke topic ko samajh kar intelligent notes banata hai.
- **Privacy Focused:** Aap control kar sakte hain ki kab ye sunna band kare.
- **Free Version Available:** Shuruat me ye free me use kiya ja sakta hai.

How to Setup:

1. Granola.ai se desktop app install karein.
2. Apne mic aur system audio ki permissions grant karein.
3. Meeting (Zoom/Meet/Slack) start hone par 'Start Listening' click karein.

Example Example & Prompt:

Example: Client call ke baad project requirements ka breakdown banana.

Prompt: "Listen to this client briefing. Create a structured project plan with deadlines and specific features requested. Export as a PDF."

6. Vibe Coding Workflow: The \$5000 Website Formula

Adarsh, ye wo advanced process hai jo premium animated websites banane ke liye use hota hai.

Step	Tool	Action
1. Image	Google Gemini	Product ki realistic image generate karein (centered, black background).
2. Effect	Google Whisk	Image par splashing, liquid, ya 3D explosion effects add karein.
3. Video	Google Flow	Dono images ko frame-to-video process se animate karein.
4. Frames	EZGIF	Video ko 100+ images (frames) me convert karke zip banayein.
5. Code	AntiGravity	Prompt dein: "Use these frames to create a scroll-animation website."

7. Mastery Checklist & Tips for Adarsh

- **Humanized Language:** Hamesha simple prompts dein. Agar code me error aaye, toh gussa na ho, bas agent ko bolein: "Hey, I see an error in login page, please fix it and run again."
- **Artifacts Check:** AntiGravity me hamesha 'Artifacts' folder check karein, wahan agent ne recordings aur screenshots save kiye hote hain.
- **MCP Customization:** Agar aapko data n8n ya Google Sheets me bhejna hai, toh custom MCP server settings me JSON paste karna na bhoolein.
- **Multi-Tasking:** Ek hi project me Login Page aur Database integration do alag agents ko dein, time 50% bachega.

Yeh guide aapko AI Development ki duniya me sabse aage rakhegi. All the best, Adarsh!
